

10 Reasons why you need Sunsect®, the first insect repellent + sunscreen combo!

1. Use ordinary insect repellent and sunscreen at the same time, and they can deactivate each other by up to 50%!

Oil-based insect repellent and water-based sunscreen don't mix. Using the same technology designed to make women's mascara waterproof, Sunsect was not only able to combine the two without deactivation, but dramatically enhance performance as well.

2. The repellent (DEET) in Sunsect lasts up to three times longer.

Sunsect's Molecular Suspension Technology effectively creates a time-release duration, allowing Sunsect, with just 20% DEET, to last longer than repellents with much higher concentrations.

3. Works on more disease-carrying and biting insects.

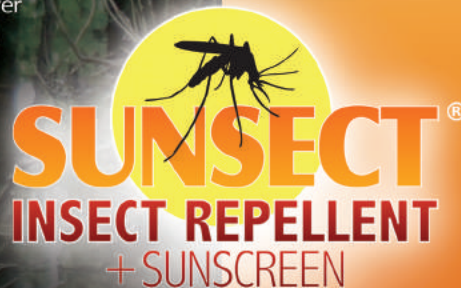

The fact is, DEET is the only insect repellent that truly works. And, it repels mosquitoes, ticks, no-see-ums, black flies, gnats, chiggers, chitres and virtually every other disease-carrying or biting insect.

4. Helps protect against Zika virus, Lyme disease, West Nile and more.

Sunsect repels insects that can carry Zika virus, West Nile disease, Lyme disease, malaria, encephalitis, Denge fever, Lassa fever, Leishmaniasis, Chikungunya and more.

5. Extremely water-resistant sunscreen, too.

Sunscreen is more important today than ever before. Sunburn can occur in as little as 20 minutes, and 90% of skin cancers caused by exposure to the sun's ultraviolet radiation. The #1 reason sunscreens fail is that they wash away in water or sweat. Sunsect resists washing away better than virtually any other sunscreen.

NO BITES! NO BURN!

PROTECTS AGAINST ZIKA VIRUS!

6. Sunsect won't harm synthetic materials.

Sunsect is clear-drying and non-greasy. Once dried, it won't harm synthetics like fishing line, plastic baits, nylon clothing, etc.

7. Totally unscented.

Sunsect's scent-free formula won't bother those with allergies or alert game.

8. Replaces two products, so it actually costs less.

With just one container to keep in your tackle box, glove box or boat, Sunsect is more convenient. Because it replaces two products, even as a premium product, it costs less.

9. Used by the U.S. Military since 1999. Now available to the public!

Sunsect was originally developed for the U.S. Military, but it's recently become available to the public.

10. It's guaranteed!

THE SUNSECT BETTER-TOGETHER GUARANTEE

IF SUNSECT ISN'T THE BEST INSECT REPELLENT AND/OR SUNSCREEN YOU'VE EVER USED, SEND IT BACK (FULL OR EMPTY) AND WE WILL REFUND YOUR FULL PURCHASE PRICE, NO QUESTIONS ASKED.
